

Pankaj Parekh

Today as our Alma Mater, I would call this Association as our Alma Mater as this a place where we have learned so much and which has shaped our professional life, completes 75 years, I am filled with immense pride and nostalgia both. Reaching the milestone of Platinum Jubilee is not an easy feat, and this has been proved rightly by our association by achieving this milestone. Our past presidents, our past office bearers have all struggled and provided us with this association even in the times when starting one felt next to impossible. I thank every one of them to contribute to our Alma Mater and helping us and guiding us to reach this milestone. As we celebrate Platinum Jubilee year, let us reminisce our fruitful years and look forward to the next milestone which would be a Centennial celebration. Let me take you all down my memory lane and reminisce those powerful and impactful years which gave my professional career a great boost. Entry into STPAM:.....
